About Me

My research employs an organizational theory lens to examine the dynamics of creative industries (such as commercial music and film), focusing particularly on industry evolution and entrepreneurial strategies for market shape and adaptation. Through a combination of empirical analysis and computational simulations (e.g., agent-based and NK models), I investigate how these industries evolve over time and the roles that entrepreneurial actions play in shaping their trajectories.

Education

University of South Carolina , Columbia, U.S.	2021 – 2025
